

My Experience at SCG Dec 2014 (1st - 22nd)

What was so unforgettable and valuable during the Siam Cement Group (SCG) International Internship program in December 1-22, 2014 was the friendship, Thai history & culture by exposing us to famous & unique Thai places like the Grand Palace, and working with professionals in a friendly work environment. Doing our individual projects, with close and friendly guidance from my mentor and presenting it to professionals (even including the head of the department), this boosted my confidence and competency for working in real life. Noticeably, SCG has a friendly and comfortable work culture where I have learned effective communication and great team working style.
